To Whom it May Concern,

I am a Microsoft consumer and I use both IBM compatible and Macintosh computers. I use Microsoft software on both types of computers. Why - because it provides the most advanced features at prices I can afford.

Even on the Macintosh, where there is very little Microsoft software available compared to the IBM compatible world, when I had the choice, I've bought Microsoft (or downloaded free) over the other venders.

You guys have done enough. Just let agreed decision carry on and let Microsoft continue to develop innovative software products.
